	SCHURTER Group				

#### Change Information:

Date	Version	Resp.	Comment
25.11.16	1.0	MTO	Initial Setup

## 1 Preface

This document contains new features in a new released version of the iPad App [2]. Initially the new features have been listed in Lotus Notes per release. This is now moved into this document. Adaptation of assortment with adding new products and moving others to phase out will not be informed explicite.

## 2 Feedback of ideas for new features

Please send a short notice of ideas for new features to the maintainer [3] in order to get it implemented.

## 3 New Features

The following list shows the new features implemented since the last version. Full details are available in the Test List [5]

Reference	Short Description	Feature
#	New Products	The new products are newly part of the navigation and link directly to the index with all new products
#187	Open/Close Category	The Variant Table might be to big to be shown, so the listing of referenced products underneath might go lost. Therefore the categories can be newly open and closed. – The variants start closed by default.
#190	Print and e-mail PDF documents	The inapp Reader will be replaced by the standard Acrobat reader to open PDF. This requires previous installation of the Acrobat Reader on the devices but offers comment, print and mailing options of the respective app.
#197	Referenced Products	Referenced products are included (alternatives, replaced and new ones)
#198	Touch Navigation	The Catalog Navigation is supported with interlinked catalog pages that offer fast access by tail navigation and refers to the respective product index that lists all products within in group.
#347	Metal Line	New publication approach of Series implemented

Luzern, 25.11.16/ M. Tobler
