#### Change Information:

Date	Version	Resp.	Comment
28.10.13	1.0	MTO	Initial Setup

## 1 Preface

This Document contains all proposed and evaluated extensions within the actual Version of the iPad App [2]

## 2 Feedback of Ideas for Improvements

Please send a short notice of potential extensions and improvement ideas to the maintainer [3] in order to get it implemented.

## 3 Registered Extensions

The following list shows the evaluated ideas for extension of the current iPad Version to be implemented ASAP.

Reference	Short Description	Feature
#190	Printing and sending PDF Documents	It would be helpful, if PDF-Documents could be sent as attachments in mail and furthermore it should be printable.
#29	Offline Film	Films have currently been removed due to file size of 700 MB. Nonetheless it would be beneficial to introduce videos within the app
#197	Reference to alternative Products	Reference like on the data sheets should be displayed especially for products that are phased out to get ideas for alternatives
#198	Touch navigation including News	It would be helpful to include touch navigation menu into overview pages
#199	Delta-Update	Instead of actualizing 700 MB for each update it would be helpful to run delta-uploads referencing versions
#35	Editorial context	Further editorial content should be added alternatively to the pdf-documents in order to search for details
#141	Copy paste for part numbers	To give further advice it will be necessary to copy part numbers e.g. into a mail. Therefore we would require a copy function
#206	Android Approach	The app should be offered additionally for Android users
#16	Index for UR, UL, ENEC, CSA	Extension of Index to locate all xx approved parts

#234	Intro Film	A video could be shown instead of showing the turning wheel while initialize the app
#244	Home Button	It would be helpful to find back to the overview of the catalog
#245	Adding White Papers	Additional Content should be included

Luzern, 28.10.13/M. Tobler
